Searching the Student/Faculty:

The screenshot shows a web application window titled "Main Screen". At the top, there is a search bar with four input fields: "Year", "Select the Course" (a dropdown menu), "RollNo", and a "Search" button. Below the search bar, on the left, is a form with three input fields labeled "Student Name", "Phone Number", and "Year Of Passing". On the right side of the interface, under the heading "Admin", there are four buttons stacked vertically: "Add New Book", "Add New Books Id's", "Remove Books", and "Available Books".

1. To search for the student, we must search with the roll number of that Student.
2. The Roll number is divided into 3 tabs to make convenient to user.
 - **Year** : The field should be filled with passing out year. The length of numbers is restricted to 2. So, you must give the last 2 digit of a year. Ex : 23, if the year is 2023.
 - **Select the course** : The course can be selected from the list provided. If we are about to search for a faculty member, then we must select faculty. Otherwise, we must select the course accordingly.
 - **RollNo** : The field should be filled out with atleast 3 digits of last 3 digits of Roll number.

3. After filling the Roll number, we must click on the search button to get the student/faculty details like this.

The screenshot shows a web application window titled "Main Screen". At the top, there is a search bar with three input fields: a roll number field containing "23", a dropdown menu showing "(504) Computer Science", and a faculty ID field containing "561". A "Search" button is to the right of these fields. Below the search bar, the student details for "SUSHANTH RAJPUT" are displayed. The details include a "Student Name" field with the name, a "Phone Number" field with "8346582365", and a "Year Of Passing" field with "2025". There are "Edit Details" and "Remove Student" buttons. To the right of the student details, there is a vertical sidebar with the title "Admin" and several buttons: "Add New Book", "Add New Books Id's", "Remove Books", and "Available Books". At the bottom of the main area, there is a table with columns: "Book Code", "Book Id", "Author", "Book Name", "Edition", and "Date Of Allotment". The table is currently empty, showing "No Books Taken". At the bottom of the window, there are two buttons: "Issue New Book" and "Return The Book".

Admin Functionalities

1. Add New Book

➤ This option is to add new book details into the database.

The screenshot shows a web browser window titled "Add New Books". Inside the window, there is a form with a blue header bar. At the top center of the form is a button labeled "ADD NEW BOOK". Below this button, there are eight input fields, each with a label to its left: "BookCode", "Book Name", "Author", "Subject Category", "Edition", "Place And Publisher", "Year", and "Pages". At the bottom center of the form is a button labeled "Save".

- **Book Code :** It is the code given based on the subject category.
- **Book Name:** It is the book title.
- **Author :** It is the name(s) of the Author(s) of the Book.
- **Subject Category :** It is the subject of the topic of Book.

- **Edition :** *It is the edition has to be given in numbers.*
- **Place and Publisher :** *It is the place and publisher name.*
- **Year :** *It is the published year.*
- **Pages :** *It is the number of Pages.*
- **Price :** *It is the price of the Book.*
 - After entering all the details, click on 'Save button' to Save the Book Details.

2. Add New Book Id's

Append New Books

Book Code

Search

Book Code	Author	Book Title	Edition	Subject Category	+
No content in table					

Enter Id's of Books

Try with the format 1,3,5,7,2-10

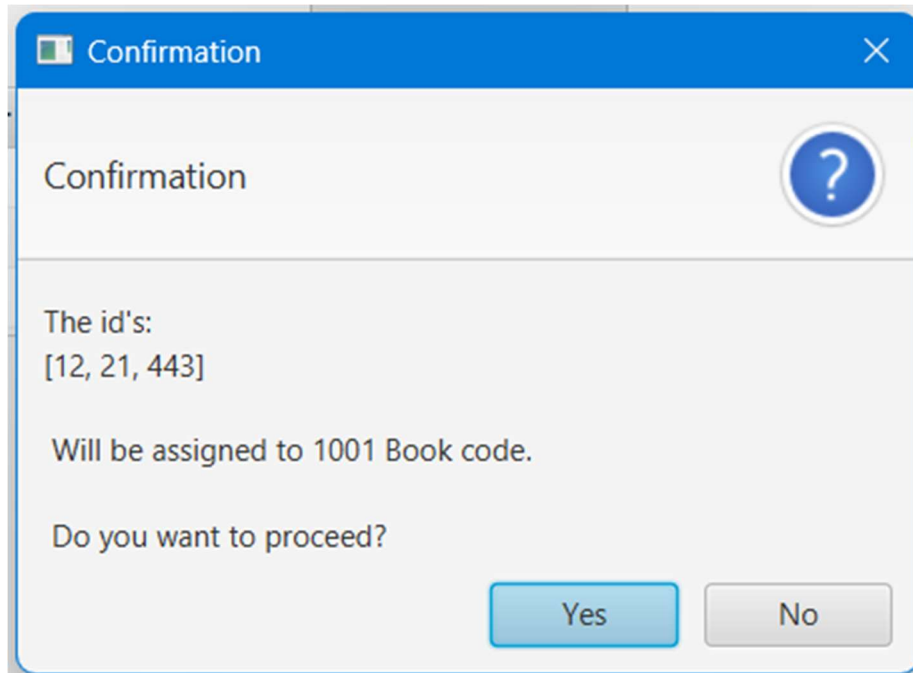

Enter the book Id's as individual (i.e.1,3,5,7) or in a batch (2-10) which includes all books having Id' s 2 to 10. You can also give individual and batch of Id's both at a time (by giving 1,3,5,7,2-10).

Save

-
- In this window, we can add books using the saved Book Details which was done by the option 'Add new Book'.
 - *Book Code : Enter the Book Code for which you want to add Books.*
 - After entering the Book Code, click on 'Search' button to see the book details in the table.
 - Enter Id's of books : In this textbox, you have to enter the book id which is unique to each book in the library unlike the Book code which is common to a group of books.
 - We can add single or multiple books at a time by giving Id's seperated
 - (a) *By commas : for example (1,3,5,7) are group of books Id's seperated by commas.*
 - (b) *By _ : for example (11-15) are group of books Id's seperated by hyphen by which all the Id's (11,12,13,14,15) between 11 and 15 are added at a time.*
 - (c) *By commas and _ : for example (1,3,5,7,11-15) by which we can add both ways we did in (a) , (b).*

We can give Id's in either of 3 ways.

- After giving Id's we have to click on 'Save' button to add those in database.
- Note that, we must not give the Id which is already given earlier.
- After clicking on 'Save' button, a dialog box will be displayed asking for confirmation.
- Click on 'Yes' to proceed, or 'No' to stop the process.

3. Remove Book

- This window is to be used when we have to remove a book when it is torn or kept aside not to use in library.
- We can remove a single Book or multiple books
 - a. by selecting 'Book Id' radio button and entering the Book Id.
 - b. By selecting 'Book Code' radio button and entering the Book code.
- After entering the Book Id/Book code, we have to click on 'Search' button by which we can see the book details in the below table.
- After we acknowledge that we got what we are searching for by seeing in the table, we can click on 'Remove' button to Remove the Book.

4. Available Books :

- This window is to used when we want to check the availability of books.
- We can enter any Book code or Book Title or any other book detail
 - I. To check the available number of books and borrowed books.

Available Books

Available Books

SEARCH

Book Code	Book Name	Author	Edition	Subject Category	Total Books	Available	Borrowed	+
1012	cs	pwsedws	9th	jhfk	3	3	0	

II. To check which Book was borrowed by which Student/faculty.

Available Books

Available Books

SEARCH

Book Code	Book Name	Author	Edition	Subject Cat...	Total Bo...	Availa...	Borrowed	Books Ids	Borro...	+
10013	automata theory	peter	5th	auto	1	0	1	[14333]	[1007235 05212 -> 14333]	

III. This will be helpful when we use the Add New Book Id's window.

- a. To fill in Book code textbox, we may have to check which Book was given which Book code.
- b. To check the which Id's are already added in the database.

Available Books

Available Books

SEARCH

Book Code	Book Name	Author	Edition	Subject Cat...	Total Bo...	Availa...	Borrowed	Books Ids	Borro...	+
10013	automata theory	peter	5th	auto	1	0	1	[14333]	[1007235 05212 -> 14333]	

Note:

- ❖ In every part of this application, for each table you see there will be a '+' symbol at top right end of the table.

Book Code	Book Name	Author	Edition	Subject Category	Total Books	Available	Borrowed	+
10013	automata theory	peter	5th	auto	1	0	1	
								✓ Book Code
								✓ Book Name
								✓ Author
								✓ Edition
								✓ Subject Category
								✓ Total Books
								✓ Available
								✓ Borrowed
								Books Ids
								Borrowed By
								Pages

- ❖ By clicking on that symbol, we can see additional columns which can be displayed by selecting. For example, in this table, we click on 'borrowed by' column to add that column.

Book Code	Book Name	Author	Edition	Subject Category	Total Books	Available	Borrowed	Borrowed By	+
1001	Ishq	Ibrahim	100	Love	5	5	0	[]	
1011	Os	peter	7th	os	6	6	0	[]	
1012	cs	pwsedws	9th	jhfk	3	3	0	[]	
1013	automata	peter	5th	auto	0	0	0	[]	
10001	Operating Systems for windows, L inux, Unix, iOSiwdbwbdfjfbcdlkj bslkdbkbfkbalflabflha	peter	7th	os	0	0	0	[]	

- ❖ Or selecting again on the column names with tick symbol, the columns will get hidden. For example, in this table, we click on 'Author' column to remove that column.

Book Code	Book Name	Edition	Subject Category	Total Books	Available	Borrowed	Borrowed By	+
1001	Ishq	100	Love	5	5	0	[]	
1011	Os	7th	os	6	6	0	[]
